

—— How to create and manage a strong ——

PASSWORD

A strong password is your first defense against cyber threats. It protects your personal data, accounts, and identity. Using a mix of letters, numbers, and symbols makes it harder for hackers to guess, keeping you safer online.

CREATING A STRONG PASSWORD IN 6 EASY WAYS

1. USE A COMBINATION OF LETTERS, NUMBERS AND SYMBOLS

4. AVOID USING PASSWORDS THAT HAVE A RECORD OF BEING STOLEN

2. ENSURE THAT ALL PASSWORDS ARE AT LEAST 12 CHARACTERS LONG

5. DON'T RECYCLE YOUR PASSWORDS

3. NEVER INCLUDE PERSONAL INFORMATION IN YOUR PASSWORDS

6. USE A PASSWORD MANAGER TO SECURELY ENCRYPT AND GENERATE STRONG PASSWORDS

HOW TO PROTECT YOUR PASSWORDS

Do not share your passwords with others

If you write your passwords down, keep it secure offline

Change your passwords frequently, especially if it has been compromised
